NARROW-LEAF EVERGREENS

THUJA ORIENTALIS AUREA NANA

(Berckman's Golden Arbovitae)

This is possibly the most popular Thuja for general use in the north as well as in the south. Our plants have that beautiful golden yellow foliage that makes a most pleasing contrast to the deep green of the other evergreens. Best results obtained when planted in well drained soil. Because of extreme hardiness (having stood 15 degrees below zero without damage) it may be used in almost any location. It is an ideal plant for most any planting. We know that OUR GOLDENS are good because we have shipped them all over the North and they have brought us many compliments on both color and shape. We have shipped one firm in the North several carloads and they want more because DODD'S GOLDENS are the best.
